
React Session 4

Mohamed Emary

August 12, 2024

1 React Component Life Cycle

1. Mounting: Place the Component into the DOM
2. Update: Change in Props or State
3. Unmounting: Remove the Component from the DOM

2 Final Project API

[API Documentation Link](#)

Base URL: `https://ecommerce.routemisr.com`

Signup: `https://ecommerce.routemisr.com/api/v1/auth/signup`

Method: POST

body of the request:

```
1 {  
2   "name": "Ahmed Abd Al-Muti",  
3   "email": "ahmedmutti@gmail.com",
